RACK SENTRY

DEPENDABLE PROTECTION FOR YOUR RACKING

RACK SENTRY

**Dependable protection.
Flexibility to fit most
every rack in every
situation.**

**Rack Sentry
takes a
beating
so your rack
systems
don't have to.**

RACK SENTRY

Rack Sentry® virtually eliminates rack damage by absorbing the force of forklift impact, and it's:

Tougher than your forklift

- **Rack Sentry**, a patented product, is moulded from a semi-flexible and stress-crack resistant plastic
- It minimizes the force of forklift impact that can damage the structural integrity of your racks and floors
- Nine pockets strategically placed throughout **Rack Sentry** are angled to deflect impact energy away from the rack
- **Rack Sentry** surrounds rack legs, protecting from damage at all angles

Easy to see

- Bright safety yellow
- UV stabilised plastic prevents fading
- Waterproof and easy to clean
- Chemical-resistant and non-conductive
- Removable for maintenance

Easy to install

- One person can install the lightweight **Rack Sentry** in seconds
- Simply position the **Rack Sentry** around any rack upright and fasten the hook and loop straps
- No tools required
- **Rack Sentry** is easily stackable for greater protection
- Save time, labour, and the cost of other materials

Cheaper than repair or rack replacement

- Protects both your inventory and the structural integrity of your rack system
- No floor damage upon impact because it is not attached to the floor
- Costs a fraction of rack, floor or inventory repair/replacement
- A one-time insurance investment

Always on duty

- Protects any rack under any condition
- Doesn't stay dented – pops back to original shape after impact, ready to stand guard again and again

RACK SENTRY

Versatility to fit most racks and profiles

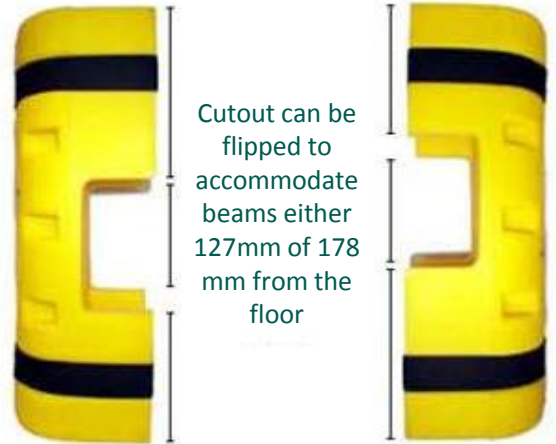

Size variations accommodate most racks

- Available in various widths to protect rack uprights 75mm to 120mm
- **Rack Sentry** provides protection, no matter the manufacturer or profile
- Each piece is 457mm tall and stackable for greater protection

Cutouts for racks with beams

- **Rack Sentry** Cutouts are available for 75mm and 100mm uprights and feature a cutaway section on the return arms to enable it to be placed over beams 127mm or 178 mm from the floor

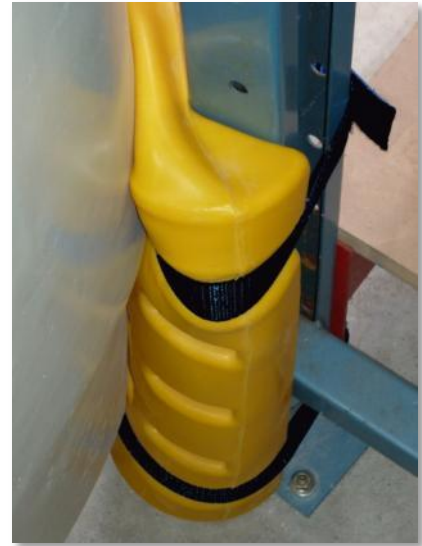

Rack Sentry End for end-of-rack applications

- Perfect for outside corners in high traffic areas
- Covers the front and end of the rack

RACK SENTRY

The complete family for protecting rack systems.
