Ulti Rubber Doors

HDT. HDS. HDC.

Ulti Group's sliding doors combine safety without compromising high standards of hygiene and durability. These GRP doors do not harbour bacteria and are unaffected by moisture and common cleaning chemicals. Their smooth, controlled, sliding action maximises space and reduces the movement of airborne micro-organisms.

Unique to Ulti Group, our fire rated sliding doors have a patented concealed intumescent strip. The strip is activated by the heat of a fire and expands to create a sealed fire door.

Our doors can be provided with a range of automations for easy, convenient access. Standard safety

features include reverse opening if an obstruction is present.

We are able to offer an inherently superior product, a product which is more hygienic, more intelligent and capable of providing the ultimate fire protection.

Ultra Clean GRP Construction.

Completely smooth and seamless gelcoat finish which is non porous and non shedding. Free from organic materials, ledges, recesses or right angles, for flawless hygiene. Proven to maximise efficiency, safety and cleanability in the most demanding environments.

Key Features

- Fully sealed, flush hygienic construction.
- Non fire rated or fire rated (F30-F180).
- Standard or bespoke sizes.
- GRP or SS frames (GRP only for fire doors).
- Customised applications: manual, automatic, interlocking, hermetic sealed, lead lined.
- Excellent resistance to most disinfectants, solvents and other strong chemicals including H2O2.
- Wide range of factory fitted hardware, vision panels and door protection.
- Naturally environmentally-friendly: long life expectancy.
- low life cycle costs.

Why Choose Sliding Doors

Ulti Group sliding doors are the ultimate solution for clean areas requiring maximum space, performance and practicality. The door cuts through the air causing minimal disturbance, whereas hinged doors can disrupt the airflow in the clean area each time they are opened.

- Creates 70% less air disturbance than hinged doors
- Reduces the spread of micro-organisms
- Safer, convenient access for high traffic areas.

- Generates extra floor space: on average 10-15%
- A better solution for those with limited space
- Eliminates the chance of a door being opened into someone.

Automations / Interlocking

Ulti Group automation & interlocking systems are designed to provide safe, efficient and convenient access in controlled environments.

Our systems can be connected to many types of activation devices from basic push button to a fully integrated building management system.

- Radar detectors
- Infrared detectors
- Push button switch
- Touchless sensor
- Key operated switch
- Code cards
- Pull switch
- Foot operated contact switch
- Pull switch
- Radio control
- Photocell
- Push pad

Key Features

- Smooth, effortless operation
- Improves traffic flow
- Reduces cross contamination
- Prevents impact damage
- Prolongs the life of the doorset
- Greater ease of operation
- Increases safety and security

Your trusted partner for complete access solutions

Dortek are recognised throughout the markets we serve for our commitment to innovation, quality and customer care.

Our clients rely on our technical expertise to find the right solution for every project and every door and to deliver that solution on time and to budget.

Dortek provide all the services and products that are needed to deliver a comprehensive solution. All Ulti Group doors can be supplied as complete door systems with the door leaf, frame, hardware, automations and vision panels to provide a fully-integrated system.

Why use Ulti Group's Hygienic Doors

- Fully encapsulated seamless construction
- Free from voids, ledges or crevices which harbour bacteria
- Fire, water, x-ray and chemical resistant
- Designed to cGMP, FDA and EU requirements
- Extremely lightweight, strong and durable
- Will not warp, swell, rust or rot
- Low maintenance, cost-effective solution
- Hinged, sliding, hermetic and automated doors
- Available in a wide range of gelcoat colours
