# Hygienic Windows

Seamless Flush Finish  
 Fire Rated or Non Fire Rated  
 Stainless Steel or GRP Frames

## LEADING EDGE TECHNOLOGY FOR SUPERIOR HYGIENE PERFORMANCE

Ultigroup windows are specially constructed to offer superior quality and to reinforce hygiene in all environments where infection control is critical. Manufactured to suit both traditionally built and modular wall systems, the Ultigroup clean-room window complies with GMP/GLP requirements. Our fire rated windows are available with up to 4 hours fire resistance. Windows are mounted into the wall system to provide a completely flush surface without ledges or joints. Insulated glass units or double flush glazing can be easily incorporated into most designs. We are market specialists; with over 45 years experience in providing high performance solutions to the worlds leading pharmaceutical, food and healthcare companies. We take responsibility for the overall planning and coordination of projects in order to deliver a complete solution.

As a leading single source supplier, we can satisfy diverse customer needs, offering you the benefits of our extensive manufacturing capability, technical expertise and innovative product solutions.

### ULTRA FLUSH

Fully sealed seamless surface for a smooth attractive finish which is easy to keep clean. Free from corners, ledges and gaps where particles and germs can accumulate.

### SUPREME QUALITY

Engineered to offer supreme visibility, quality and hygiene in the most demanding environments. These windows will not rot, rust, condense or corrode. Designed to meet ISO and GMP requirements.

### WATER & CHEMICAL PROOF

Unaffected from exposure to water, steam, disinfectants, chlorine and strong chemicals even after decades of use.

### SMARTGLASS TECHNOLOGY

Through the use of liquid crystal technology, we can offer smart glass windows which change from transparent to opaque in just one switch. Allowing total privacy without the need for blinds, curtains or shutters.

### INTEGRATED BLINDS

Alternatively, we also offer windows with integrated blinds. The blinds are fixed between two panels of glass to prevent the build up of dust, dirt or bacteria.

### LEAD LINING

Windows can incorporate x-ray shielding for varying lead thicknesses depending on the required specification.

### TURNKEY SOLUTIONS

Ultigroup provides complete solutions which are individually crafted to meet your specification. We offer a wide range of windows, transfer hatches, doors, frames, ironmongery, vision panels, access controls, automations and interlocking.
